

SANUPS

New Product Information

E11A Hybrid UPS 1-3kVA Single phase

SANYO DENKI EUROPE SA. is pleased to introduce its «SANUPS E» E11A Hybrid UPS. The E11A Hybrid UPS offers 95% efficiency in EcoMode, saves money, reduces waste of energy and contributes to the global environment. It protects your investments in technology equipment from commercial power: spikes, surges, electrical noise, load fluctuation and outage. With over 40 years of experience in UPS design, SANYO DENKI ensures the superior quality of SANUPS E11A Hybrid UPS.

UL (E226092), CE, FCC Part 15 Subpart B Class A

■ Main Specifications

- Reference : **E11A*02A0**USJ**
- **3 models:** 1kVA (0,7kW), 2kVA (1,4kW) and 3kVA (2,1kW)
- **3 reliable and efficient operation modes:** EcoMode, Active Filter Mode and Double Conversion Mode
- Large input voltage range from 200 to 240VAC Power Factor > 0,9
- **50 or 60Hz auto-sensing**
- Output voltage 200 to 240VAC selectable. Single phase 2 wires
- **Long life hot swappable battery**, with auto test cycle and deep discharge protection
- External batteries extension
- **Low noise** (40dB), with fan speed controlled according to the load
- High over load capacity: 200% 30 sec, 800% 2 cycles
- Can be installed horizontally, vertically or in a 19-inch rack (2U)
- **Connections:** RS232, LAN (SNMP, Telnet, Email...), EPO

■ Key benefits

1 3 operation modes:

- Efficiency Priority Mode (EcoMode 95% efficiency)
- Active Filter Mode (harmonics and power factor corrector)
- Power supply quality priority Mode (Double Conversion)

The UPS automatically selects the best mode based on the power supply and the load power.

2 Automatic battery check:

It notifies well in advance any battery failure, reinforcing the load device protection.

3 Maintainability:

Long life and hot swappable battery (5 years expected at 25°C), cycling battery auto test and optional bypass unit reduce the cost due to the maintenance.

4 Network compatibility:

The optional UPS management software «SANUPS SOFTWARE» and a LAN interface card allow UPS monitoring and control over the network (SNMP, Telnet, Email...).

5 Low noise for use in offices

6 Eco Product:

We certify the environmental soundness of the product with Life Cycle Assessment (LCA).

■ Target Applications

Local area networks, servers, data centers, bank cash dispensers, transportation management, telecommunication devices, industrial PLC, emergency and security devices (alarms, video, supervision room,...).
